

BENCHKAM FULL HD CAMERA FOR VISION LUXO MAGNIFIERS

SKU: BenchKam

VISION FULL HD CAMERA FOR BENCH MAGNIFIERS

BenchKam by Vision Engineering is a unique Full HD camera that adds the option to capture and share images from WAVE LED and CIRCUS LED Vision-Luxo magnifying glasses. Ideal for mechanical, electronics, plastics, dental, jewellery and other precision applications.

Main features

- **Quick and convenient image capture** - Can be used for documentation, reporting and sharing with customers, suppliers and colleagues. Ultimately helping with multi-tier supply chain management
- **Clear Workspace** - Fitting neatly onto the magnifier, BenchKam can be conveniently left on the unit (there is no need for storing the camera separately)
- **Training** - A useful tool that **can be used to share a live stream** with colleagues and customers. When inspecting samples, BenchKam can add new capabilities and collaboration by allowing multiple people to view the subject at the same time.

Specifications

- Image capture, sharing and streaming available through the supplied software
- Maintains the 3D view available through the magnifier
- Compatible with **WAVE LED** (including **UV** and **ESD** variants) and **CIRCUS LED** Vision-Luxo magnifiers
Both models boast K-arm technology, spring balanced arms, controllable 3D or ring lighting. Lamp heads can be secured in any position without drifting
- **FULL HD Logitech Camera**
Compatible with **Windows** 7, 8, 8.1 and 10
Resolution: Full HD 1080p, 1920x1080
Focus: Autofocus lens
Lens material: Glass
Cable length: 91cm
Connection: USB 2.0
- Exclusive to Vision Engineering.
