

EL600 AUTOMATIC MIXER FOR SOLDER PASTE

SKU: 159563C

SOLDERING PASTE MIXER

EL-600 - Planetary centrifugal mixer for solder paste, suitable for **2 jars**.

Ideal for optimizing solder paste viscosity before stencil printing and reflow soldering processes.

The jars, positioned inside the mixer at an angle of 45°, are rotated at high speed according to the principle of planetary rotation.

The paste is then **mixed on 3 axes**, uniformly arranging the solid and liquid parts inside and eliminating air bubbles.

Thanks to the adjustable mixing speed and time, is possible to obtain always the same viscosity and uniform quality printing results.

After being mixed, the paste will be less likely to absorb moisture.

It is not recommended to mix the hardened paste directly from the refrigerator, but only after a minimal **tempering time**.

Specifications

- Suitable for 2 doses: **2 x 250 g** or **2 x 500 g**
- Jar diameter: **50 - 67 mm** - Grade: 45°
- Average mixing time (at a speed of 500 RPM): **3 minutes**
- Digital timer control with memory settings - Range: **0 - 99 minutes**
- Speed regulation: **200 - 1400 RPM**

- Power: 60 W
- Voltage: 230 V
- Dimensions: 400 x 400 x 450h mm
- Weight: 35 kg.

ATTENTION: THE PRODUCT MAY PRESENT AESTHETIC DIFFERENCES COMPARED TO THE PUBLISHED IMAGE.
REGARDING THE CONTROL PANEL, PLEASE REFER TO THE DETAILS PUBLISHED IN THE IMAGE GALLERY.
