

EXTERNAL POWER SUPPLY FOR STANDSTAT II TEST STATIONS

SKU: 149971H

External power supply for STANDSTAT II test stations, to be used instead of the 9 V battery.

The external power supply enables the station to work in "Hands-Free" mode, as described in the product's TDS.

Voltage: DC 9 V / 100 mA. Connection: jack 2.1 mm.

ATTENTION: REMOVE THE 9 V BATTERY IF YOU USE THE EXTERNAL POWER SUPPLY.

To use STANDSTAT II correctly, read carefully the instructions given in the user manual which is supplied with the product.
