

TWO-SIDES PRESENSITIZED BOARD POSITIVE BASE (1.5MM, 35M CU)

SKU: FR4-1.5-35CU-2

BUNGARD PRESENSITIZED BASE MATERIAL - DOUBLE SIDE

FR4 two-sides boards 1.5 mm thick, copper thickness 35 micron, presensitized with **positive photoresist**, IPC 4101A compliant. Provided with protective film.

Available in 8 different sizes (mm): **75×100** (101187C), **100×160** (101073C), **125×175** (101349B), **150×200** (101075C), **160×233.4** (101068F), **150×250** (101363B), **200×250** (101372B), **210×300** (101076C).

The **Bungard original plates** are a guarantee of quality and linearity in the process of **PCB production**. The laminates used for the realization of Bungard plates allow a production error free, fast and flexible even for small series or prototypes.

VARIATIONS

| SKU | Description | Dimensions |
|---------|-------------|------------|
| 101073C | | 100x160 mm |

| SKU | Description | Dimensions |
|---------|-------------|--------------|
| 101349B | | 125x175 mm |
| 101075C | | 150x200 mm |
| 101363B | | 150x250 mm |
| 101068F | | 160x233,4 mm |
| 101372B | | 200x250 mm |
| 101076C | | 210x300 mm |
| 101187C | | 75x100 mm |
