

NO-CLEAN TECHSPRAY DESOLDERING WICK (8 SIZES)

SKU: 1014

NO CLEAN DESOLDERING BRADE BY TECHSPRAY

Techspray No-Clean desoldering wick, available in nine different sizes.

Does not leave behind ionic flux residues that can collect and form branches called “dendrites”. Other fluxes, if not cleaned properly, can cause dendrites that grow over time and eventually cause short circuits between traces or leads. Latent failures lead to costly returns and lower the quality perception of your products.

Meets or exceeds: MIL-F-14256, NASA NHB 5300, 4 (34-1), NASA NPC 200-4, NASA SP5002, IPC Standard-J-STD-004. Supplied with **anti-static plastic spool** to prevent static build-up from damaging sensitive components.
