

SMD COVER TAPE EXTENDER (50M, 4 SIZES)

SKU: CTE

SMD REELS COVER TAPE EXTENDER, 50 M

The **SMT cover tape extender** **minimizes electronic component waste** by giving you 396 or 500 mm of **non-adhesive film** to start through the tape feeder when loading already used component reels.

Thickness: **50 μ**. The extender must be fixed to the strip end, before putting it on the feeder.

This solution is an **alternative to splicing**, suitable for small and medium productions.

Available sizes:

- CTE108 (071930N) - Width: **8/12 mm** - Package content: **500 pieces**
- CTE116 (071930B) - Width: **16 mm** - Package content: **500 pieces**
- CTE124 (071930C) - Width: **24 mm** - Package content: **250 pieces**
- CTE132 (071930D) - Width: **32 mm** - Package content: **250 pieces**.
