

QUICKSTAT ECN - ESD FLOOR MAT (8 COLOURS, 2X23M)

SKU: QUECN

ESD FLOOR MAT ROLL, 2X23M

QUICKSTAT ECN - Anti-static, ESD safe floor mat in 23 metres roll, characterized by an easy, quick and cost-effective installation process.

Double-layer type (static dissipative / conductive): its conductivity depends on the **highly conductive lower layer**.

In very small areas (up to 2 sqm, using a single mat cut), QUICKSTAT can be layed simply using a common double-sided adhesive tape, making possible an effective installation at extremely low costs. Earthing can be done by installing a grounding cable equipped with a 1 MOhm resistor.

In bigger areas (and in any case, when using multiple mat cuts), the use of conductive glue* is necessary, having previously installed a copper grid on the floor below for grounding, connected with earthing points.

Roll dimensions:	2 x 23 m
Selling unit:	square metre
Minimum order quantities:	46 sqm and multiples

Specifications

- **Available colours:** Light grey (131857A), Medium grey (131942N), Dark grey (131942B), Beige (131942C), Warm beige (131942D), Green (131942E), Dark green (131942F), Medium blue (131732E).

- Thickness: **2 mm**
- Material: PVC
- Floor type (ISO 10581): **Homogeneous vinylic flooring, static dissipative.**

*ATTENTION: In case of gluing, QUICKSTSAT can only be installed in environments with rising damp values lower than 2%.

VARIATIONS

SKU	Description	Colour
131942D		Warm beige
131942N		Medium grey
131732E		Medium blue
