WELLER WXP 200 SOLDERING IRON

WXP 200 - Intelligent soldering iron 200 W 24 Vac, equipped with **XHT D** chisel-shaped soldering tip (width 5 mm x thickness 1.2 mm).

The most efficient soldering iron for WX stations. Suitable for **very large components** with medium/high energy demand.

Parameter memory (such as standby temperatures and automatic switch-off time).

Visual process control through the **LED signal** function. A built-in motion sensor reduces total costs of ownership.

Weller product no.: **T0052920599N** - UPC: 037103304926.

Specifications

- Power: **200 W**
- Supply voltage: 24 Vac
- Temperature range (depends on tool): **93 - 454 °C**
- Heating time (50 - 350 °C): approx. 19 sec
- Heating technology: **Power Response** with improved sensor position

- ESD safe: Yes
- Tip family: **XHT**
- Compatible control units: WX 1 / WX 2 / WXA 2 / WXD 2 / WXR 3 / WXsmart.
